

Font Risk Reports That Identify Serious Licensing Problems

Quickly identify font usage issues in creative projects and see the steps to resolution with **Connect + Insight's Font Risk Assessment Report**.

62.4% of creative professionals worry about unlicensed fonts and digital assets.*

It's time to take the pressure off with a fast pre-production audit that reports font usage and font license risks to fix before it's too late.

Run **Font Risk Assessment Reports** for Adobe files at any point during the creative process, no matter where the files are stored.

The report streamlines the auditing process by quickly **summarizing potential font usage and licensing risks** and suggesting resolution steps, all in an accessible PDF format.

Faster And Easier Pre-Production Audits

Creative leaders appreciate these report benefits:

- + Reduces the risk of both costly reworks and legal disputes.
- + Audits on-demand to avoid last-minute issues.
- + Works within preferred tools to minimize disruption to project workflows.
- + Evidence of compliance adds value to final deliverables.
- + Protects brand integrity internally and for clients.
- + Saves budget: informs font purchase and repurchase decisions.

Upload font End User License Agreements (EULAs) to your library.

Use Project Risk Scanning to scan Adobe files for font usage risks.

Receive your Font Risk Assessment Report, a PDF summary of font issues with steps to correct identified problems.

Follow recommended steps to resolve identified font usage risks.

The Power To Report On Real Project Risks

The report identifies the following font problems:

- + Missing fonts—including system and subscription fonts
- + Outdated font formats—including PostScript Type 1
- + Unlicensed fonts
- + Expired and soon-to-expire font licenses
- + Overutilized font licenses—fonts installed on more systems than the license allows

By identifying issues and logical solutions immediately, the **Font Risk Assessment Report** also saves teams serious time compared to manual audits, especially when multiple issues are present.

⚠ Risks Found: 2	✅ No Risks Found: 3
Criteria	
⚠ Missing Fonts	Fonts are not available in Connect (includes unavailable system and subscription fonts).
⚠ Non-Licensed Fonts	Fonts are not associated or do not have a license in Connect.
✅ Postscript Fonts	Unsupported PostScript Type 1 Fonts
✅ Expired/Expiring Licenses (< 90 days)	Fonts are associated with an expired or expiring license.
✅ Over-utilized fonts	Fonts are installed or active on more systems than licenses allow.

“Extensis has been instrumental in enabling our company to operate efficiently, maintain compliance, and seamlessly manage fonts and user access for an extended period.”

– Keith Clements, Senior Director,
Strategic Operations, SANDOW Design Group
