

Effortless Creative Reviews in Adobe Documents, with Built-In Font Risk Mitigation – Only with Connect + Insight

Adobe’s status as the most popular design software means thousands of creative teams rely on programs like Photoshop, Illustrator, InDesign, Premier Pro, and After Effects every day to get their work done.

However, creating any project, even with Adobe products, carries creative risks that can impact the final result:

- Am I sure the correct fonts are being used?
- Can I prove my assets are properly licensed?
- Did a team member change something when they collaborated?
- **How can I prove everything is right when I send my creative asset to a client or to production?**

“Extensis has been instrumental in enabling our company to operate efficiently, maintain compliance, and seamlessly manage fonts and user access for an extended period.”

**Keith Clements, Senior Director,
Strategic Operations, SANDOW Design Group**

Reduce Last-Minute Revisions And Errors By 50%

In addition to providing a place to search, share, store, and edit fonts and creative assets made in Adobe,

Connect + Insight identifies risks that Adobe doesn’t:

- Quick-scanning engine to report on risks in Adobe documents at any point of the creative process, no matter the stage or where they’re stored.
- Licensing compliance and risk management reporting, including exporting compliance PDFs to share with clients or a production team.
- Insight into how your fonts and Adobe documents are connected to save creative hours comparing brand guidelines with your work.
- Licensing Status Dashboard to alert teams to licenses that are expired or expiring soon.

Want To See How We Can Work For You?

Book a demo and we’ll walk you through a future where Adobe users can accelerate the creative process and prevent any font or file problems from becoming a challenge in the handoff to production:
